AVAILABLE TREATMENTS

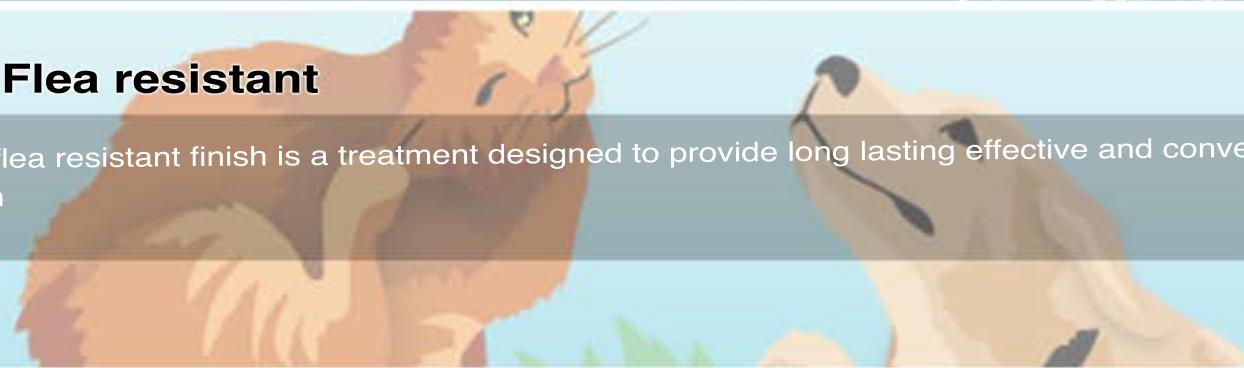

Anti microbial

An anti microbial coating is an application of a chemical agent on a surface that can stop the growth of a disease-causing micro-organisms. Apart from increasing the surface's durability, appearance, corrosion resistance etc, these coatings also protect from harmful disease-causing microbes.

Tick & Flea resistant

Tick and flea resistant finish is a treatment designed to provide long lasting effective and convenient insect protection

Water repellent

WR is a coating added to fabrics at the factory to make them water-resistant, water repellents are commonly used in conjunction with waterproof breathable fabrics to prevent the outer layer of fabric from becoming saturated with water.

Anti odour

Odour resistant fabrics are those with an anti microbial component that is designed to eliminate bacteria growth before it mixes with sweat to create odour.

AVAILABLE FILLINGS

Polyfill

Polyester fiberfill is a synthetic fiber used for stuffing pet beds and soft objects such as stuffed toys.

Recycled polyfill

The rather complex process of converting used plastic bottles into useful polyester fiber filling.

Recycled cotton

Recycled cotton can come from second hand clothing or from cotton textile waste or leftover which are then spun into new yarn and fabrics.

Organic kapok

Kapok fiber is a natural organic pillow filling - good for the environment and your home. Organic kapok fiber is a natural organic cotton-silk like fiber that naturally harvested from the tropical kapok tree

AVAILABLE FOAM

Normal foam

The normal foam used in homes for mattresses are available in many types. They are made of latex which is a natural product. While normal foams are made using standard polyurethane, FR foam is made using non-inflammable polyurethane and melamine.

Convoluted foam

The term convoluted describes foam with a ridged design that has peaks and valleys. Often called egg crate foam, convoluted foam is lighter than a solid piece of foam and allows for added airflow. Foam mattress toppers often use convoluted foam for added support.

Memory foam

Memory Foam, also known as Viscoelastic Foam, is excellent quality foam available in soft firmness only. It is widely used for mattresses and therapeutics because of its excellent pressure relief.

Shredded foam

Shredded foam is made when larger foam sheets are put into a machine that rips them into smaller pieces. Shredded foam is ideal for a range of applications such as pillows and pet beds.

REDUCE

RECYCLE

REUSE

Recycle today for better tomorrow

“

We produce sustainable, high quality pet products with different attractive technologies for pet lovers across the world. Our products made by new recycling technologies which turn plastic bottles into soft, polyester thread to make eco-friendly clothing. Conveniently, plastic bottles and polyester thread are actually made of the same substance.

Soft & Fluffy

Indoors

- Quilted Velvet
- High quality fibre filling
- Anti slip Bottom

Quilted Victoria rectangle bed is made with a quilted pattern, which involves stitching layers of fabric together to create a padded and low pile plush surface. This design ensures that the filler stays evenly distributed, offering a cozy and comfortable resting place for the pet. The bed is shaped like a rectangle, providing ample space for the pet to stretch out and relax. The shape also makes it suitable for pets of various sizes. Quilted Victoria pet bed comes with a removable filler, typically in the form of a cushion or foam padding. This feature allows for easy cleaning and maintenance. You can take out the filler and wash the cover separately, ensuring a clean and hygienic resting space for your pet. To prevent the bed from sliding or moving around on slippery surfaces, it is equipped with an anti-skid or non-slip bottom. This ensures stability and safety for your pet when getting in and out of the bed.
